GLEBE HOUSE
On Glebe Farm, New Castle, Delaware

Owner: Rector, Wardens and Vestry of Immanuel Church,
New Castle, Delaware

Date of Erection: About 1830

Present Condition: Good. Some modern additions:- chimney
on east side, a window and probably the front porch.

Number of Stories: Two and one half, with cellar and small
loft under ridge. Lower service wing in rear.

Materials of Construction: Brick. Plastered interior; shingle
roof; usual woodwork.

Other Existing Records: Immanuel Church Records; New Castle
on the Delaware by WPA Writers Project.

Additional Data: The house has the characteristics of the
local buildings of the 1825-35 decade. The north west gable
end with its double chimneys with connecting wall, give
dignity to the whole house. The large-light windows and
and single dormer window on front, the reduced brick cornice
with the very slightly projecting roof, and the simple wood-
work are characteristics of the date and locality.

Laussat. R. Rogers
